

Fish with rice

Adult Cat

Naturals Range

The **Naturals** range offers a selection of recipes that benefit from the finest freshly prepared protein sources.

The range provides a variety of recipes formulated for pets with sensitive digestion.

Why Fish?

White Fish are a source of protein and vitamins B6, B12 and niacin. They are also a source of omega 3 fatty acids which may help to support skin and coat health and healthy joints.

Why Rice?

Rice is an easily digestible carbohydrate source ideal for cats with sensitive digestion.

Why do Adult Cats need a specific recipe?

From 12 months of age, cats require a complete and balanced diet formulated for adults to help support their everyday health & well-being and provide everything they need throughout their adult years. Unlike dogs, cats cannot synthesize all amino acids within their body and so it is essential that these are provided in the diet to maintain their health.

Our adult cat recipe is a great source of quality protein, rich in essential amino acids including taurine and vitamin A to help support the heart & vision, along with omega 3 which also promotes good coat & skin condition. This complete diet provides the confidence that the cat has everything they require to lead a happy and healthy life.

Recipe Claims

38% Total Fish

Rich in essential amino acids, vitamins & minerals to promote every day health and well-being.

4% Freshly Prepared Fish
