Salmon & Chicken with rice

Adult Cat

Super Premium Range

The **Super Premium** range benefits from a variety of high quality protein sources.

The range provides a selection of recipes formulated to meet the specific needs of kittens and cats.

Why Salmon?

Salmon is naturally rich in omega 3 essential fatty acids which have anti-inflammatory properties and provide support for skin and coat condition and joint health.

Why Chicken?

Chicken is a lean protein source rich in essential amino acids. It is also a good source of vitamins & minerals including B vitamins and iron which may help contribute to overall health and well-being.

Why do Adult Cats need a specific recipe?

From 12 months of age, cats require a complete and balanced diet formulated for adults to help support their everyday health & well-being and provide everything they need throughout their adult years. Unlike dogs, cats cannot synthesize all amino acids within their body and so it is essential that these are provided in the diet to maintain their health.

Our adult cat recipe is a great source of quality protein, rich in essential amino acids including taurine and vitamin A to help support the heart & vision, along with omega 3 which also promotes good coat & skin condition. Added cellulose and beet pulp, sources of insoluble fibre help to reduce the formation of hairballs. This complete diet provides the confidence that the cat has everything they require to lead a happy and healthy life.

Recipe Claims

60% Total Fish & Chicken

Rich in essential amino acids, vitamins & minerals to promote everyday health and well-being.

26% Freshly Prepared Salmon
